

UChat Video Platform — Portal Pages & Cross-Portal Connectivity

Table of Contents

1. Owner Portal
2. Admin Portal
3. User Portal
4. Editor Portal
5. Cross-Portal Connectivity Map
6. Notification & Action Triggers
7. Complete Navigation Flow Diagrams

1. Owner Portal

Role: Platform Owner / Agency Owner

Purpose: Manage multiple workspaces, configure APIs, inspect any workspace as any role, oversee entire platform.

1.1 Landing / Overview Page

Route: /dashboard/owner

Description: High-level dashboard showing all owned workspaces, total projects across all workspaces, active members, API health status, and recent activity logs.

Key Elements: - Workspace cards with member count, project count, status - Quick actions: Create Workspace, Invite Member, Add API

- Workspace cards with member count, project count, status
- Quick actions: Create Workspace, Invite Member, Add API
- Analytics summary: Videos generated this month, publishing success rate
- Recent activity feed across all workspaces

Navigation From Here:

- Click Workspace Card → Workspace Detail Page
- Click “Create Workspace” → New Workspace Page
- Click “View All Projects” → Cross-Workspace Projects Page
- Click “Manage APIs” → Global API Management Page

1.2 Workspaces List Page

Route: /dashboard/owner/workspaces

Description: Grid/table view of all workspaces with search, filter, and sort capabilities.

Key Elements: - Workspace name, slug, creation date, status (active/suspended) - Member count, project count, subscription tier

- Workspace name, slug, creation date, status (active/suspended)
- Member count, project count, subscription tier
- Actions: Edit, Suspend, Archive, Enter Workspace, Delete
- Bulk actions for multi-workspace management

Navigation From Here:

- Click “Enter Workspace” → Workspace Detail Page (acts as Admin/User inside that workspace)
 - Click “Edit” → Workspace Settings Page
 - Click “New Workspace” → Create Workspace Page
-

1.3 Create New Workspace Page

Route: /dashboard/owner/workspaces/new

Description: Form to create a new workspace for a client/business.

Key Elements: - Workspace name, slug (auto-generated), description - Logo upload

- Workspace name, slug (auto-generated), description
- Logo upload
- Initial admin email (auto-invites first admin)
- Subscription tier selection
- Default API configurations (inherit from owner or custom)

Navigation From Here:

- Submit → Workspaces List Page (with success toast)
 - Cancel → Workspaces List Page
-

1.4 Workspace Detail Page (Owner View)

Route: /dashboard/owner/workspaces/[workspaceId]

Description: Deep dive into a specific workspace. Owner can view everything as an observer or switch to “Act As” mode.

Key Elements: - Workspace info card (name, slug, status, created date) - Member list with roles (Admin, User, Editor, Support, Viewer)

- Workspace info card (name, slug, status, created date)
- Member list with roles (Admin, User, Editor, Support, Viewer)
- Project list within workspace
- Configured APIs list
- Activity logs specific to workspace
- “Act As Admin” button → Redirects to Admin Portal for this workspace

- “Act As User” button → Redirects to User Portal for this workspace

Navigation From Here:

- Click “Act As Admin” → Admin Dashboard (scoped to this workspace)
 - Click “Act As User” → User Dashboard (scoped to this workspace)
 - Click “APIs” tab → Workspace API Config Page
 - Click “Members” tab → Workspace Member Management Page
 - Click “Projects” tab → Workspace Projects Inspection Page
 - Click “Settings” → Workspace Settings Page
-

1.5 Workspace Settings Page

Route: /dashboard/owner/workspaces/[workspaceId]/settings

Description: Configure workspace-level settings.

Key Elements: - Rename workspace, update slug, description - Change logo

- Rename workspace, update slug, description
- Change logo
- Update subscription tier
- Archive/suspend workspace
- Delete workspace (with confirmation)
- Default project settings

Navigation From Here:

- Save → Workspace Detail Page
 - Cancel → Workspace Detail Page
-

1.6 Workspace API Configuration Page

Route: /dashboard/owner/workspaces/[workspaceId]/apis

Description: Add, edit, or remove third-party API integrations for a specific workspace.

Key Elements: - List of configured APIs (Voice, Video, Subagic, Zernio, Custom) - API status indicators (active/inactive/error)

- List of configured APIs (Voice, Video, Subagic, Zernio, Custom)
- API status indicators (active/inactive/error)
- Test connection button for each API
- Add new API button
- View encrypted key (masked, reveal on click with password confirmation)

Navigation From Here:

- Click “Add API” → New API Config Page
 - Click “Edit” on API card → Edit API Config Page
 - Click “Test” → Test result modal
 - Back → Workspace Detail Page
-

1.7 New API Config Page

Route: /dashboard/owner/workspaces/[workspaceId]/apis/new

Description: Form to add a new third-party API to a workspace.

Key Elements: - Provider dropdown (Voice AI, Video AI, Subagic, Zernio, Custom) - API name (display name)

- Provider dropdown (Voice AI, Video AI, Subagic, Zernio, Custom)
- API name (display name)
- API key input (encrypted on save)
- API secret input (if applicable)
- Endpoint URL (for custom providers)
- Provider-specific configuration JSON editor

Navigation From Here:

- Save → Workspace API Config Page
 - Cancel → Workspace API Config Page
-

1.8 Workspace Member Management Page

Route: /dashboard/owner/workspaces/[workspaceId]/members

Description: Full CRUD for workspace members. Owner can add, remove, change roles, reset passwords.

Key Elements: - Member table: Name, Email, Role, Status, Joined Date, Last Active - Role filter dropdown

- Member table: Name, Email, Role, Status, Joined Date, Last Active
- Role filter dropdown
- Search by name/email
- Actions: Edit Role, Reset Password, Remove, Suspend
- “Invite Member” button
- Bulk actions

Navigation From Here:

- Click “Invite Member” → Invite Member Modal/Page
- Click member row → Member Detail Modal

- Back → Workspace Detail Page
-

1.9 Invite Member Page/Modal

Route: /dashboard/owner/workspaces/[workspaceId]/members/invite

Description: Invite new members to workspace with role assignment.

Key Elements: - Email input (single or bulk comma-separated) - Role selector (Admin, User, Editor, Support, Viewer)

- Email input (single or bulk comma-separated)
- Role selector (Admin, User, Editor, Support, Viewer)
- Custom message (optional)
- Generate temp password toggle (default ON)
- Send invite button

Navigation From Here:

- Send → Member Management Page (with success confirmation)
 - Cancel → Member Management Page
-

1.10 Workspace Projects Inspection Page

Route: /dashboard/owner/workspaces/[workspaceId]/projects

Description: View all projects within a workspace without editing capability (read-only inspection).

Key Elements: - Project cards/table with title, status, creator, progress, deadline - Status filter (Idea, Scripting, Voice, Video, Editing, Published)

- Project cards/table with title, status, creator, progress, deadline
- Status filter (Idea, Scripting, Voice, Video, Editing, Published)
- Search by project name
- Click to view project detail (read-only)
- Export project list

Navigation From Here:

- Click Project Card → Project Detail Inspection Page (read-only)
 - Back → Workspace Detail Page
-

1.11 Project Detail Inspection Page (Read-Only)

Route: /dashboard/owner/workspaces/[workspaceId]/projects/[projectId]

Description: Read-only view of any project within a workspace. Owner can see full timeline, assets, and activity but cannot modify.

Key Elements: - Project header (title, status, creator, deadline) - Timeline visualization (Idea → Script → Voice → Video → Edit → Publish)

- Project header (title, status, creator, deadline)
- Timeline visualization (Idea → Script → Voice → Video → Edit → Publish)
- Script content (view only)
- Voice audio player
- Video preview player
- Publishing status per platform
- Activity log for this project

Navigation From Here:

- Back → Workspace Projects Inspection Page
 - Click “Enter as Admin” → Admin Project Detail Page (editable)
-

1.12 Cross-Workspace Projects Page

Route: /dashboard/owner/projects

Description: Aggregated view of all projects across all workspaces for quick oversight.

Key Elements: - Projects from all workspaces in one list - Workspace name badge on each project

- Projects from all workspaces in one list
- Workspace name badge on each project
- Global filters: Status, Date Range, Workspace
- Sort by: Recently updated, Deadline, Progress

Navigation From Here:

- Click Project → Project Detail Inspection Page
 - Filter by Workspace → Workspace Projects Inspection Page
-

1.13 Global API Management Page

Route: /dashboard/owner/apis

Description: Manage API integrations across all workspaces from one place.

Key Elements: - Table: API Name, Provider, Workspace, Status, Last Used - Global health dashboard (which APIs are failing)

- Table: API Name, Provider, Workspace, Status, Last Used
- Global health dashboard (which APIs are failing)
- Bulk update capabilities
- API usage analytics

Navigation From Here:

- Click API row → Edit API Config Page
 - Click Workspace name → Workspace Detail Page
-

1.14 Owner Profile & Settings Page

Route: /dashboard/owner/settings

Description: Owner's personal account settings.

Key Elements: - Profile info (name, email, avatar) - Change password

- Profile info (name, email, avatar)
- Change password
- Two-factor authentication
- Notification preferences
- Billing/subscription management
- Platform-wide settings (if applicable)

Navigation From Here:

- Save → Owner Dashboard
-

2. Admin Portal

Role: Workspace Admin / Organization Manager

Purpose: Manage team, oversee all projects, schedule deadlines, configure workspace settings.

2.1 Admin Dashboard / Overview

Route: /dashboard/admin

Description: Central hub for workspace administration. Shows team activity, project statuses, upcoming deadlines, and quick actions.

Key Elements: - Stats cards: Total Users, Total Editors, Active Projects, Completed This Month - Recent team activity feed

- Stats cards: Total Users, Total Editors, Active Projects, Completed This Month
- Recent team activity feed
- Upcoming deadlines (next 7 days)
- Projects needing attention (stuck in editing, overdue)
- Quick actions: Add Member, Create Deadline, View Calendar

Navigation From Here:

- Click "View All Projects" → Admin Projects Page
- Click "Manage Team" → Team Management Page

- Click “Calendar” → Calendar/Scheduling Page
 - Click “Workspace Settings” → Admin Workspace Settings
 - Click specific project card → Admin Project Detail Page
-

2.2 Admin Projects Page

Route: /dashboard/admin/projects

Description: View all projects created by all users in the workspace. Admin can inspect, edit, or reassign.

Key Elements: - Project table: Title, Creator, Assigned To, Status, Progress, Deadline, Actions - Filters: Status, Creator, Date Range, Priority

- Project table: Title, Creator, Assigned To, Status, Progress, Deadline, Actions
- Filters: Status, Creator, Date Range, Priority
- Search by project name
- Actions: View, Edit, Delete, Reassign, Change Deadline
- Export to CSV

Navigation From Here:

- Click “View” → Admin Project Detail Page
 - Click “Edit” → Admin Project Edit Page
 - Click Creator name → Member Detail Modal
 - Click “New Project” (optional admin creation) → Project Create Page
-

2.3 Admin Project Detail Page

Route: /dashboard/admin/projects/[projectId]

Description: Full project view with editing capabilities. Admin can modify any aspect of any user’s project.

Key Elements: - Project info with edit buttons on each field - Full timeline with ability to manually advance/rollback stages

- Project info with edit buttons on each field
- Full timeline with ability to manually advance/rollback stages
- Script editor (can modify)
- Voice regeneration controls
- Video regeneration controls
- Reassign project to different user
- Add internal notes (admin-only visible)
- Activity log

- Delete project button

Navigation From Here:

- Click “Edit Script” → Script Editor (with admin privileges)
 - Click “Reassign” → Member Selector Modal
 - Click “Back” → Admin Projects Page
-

2.4 Team Management Page

Route: /dashboard/admin/team

Description: Central page to manage all workspace members.

Key Elements: - Tabs: All Members, Users, Editors, Support, Viewers - Member cards/table with avatar, name, email, role, status, projects count

- Tabs: All Members, Users, Editors, Support, Viewers
- Member cards/table with avatar, name, email, role, status, projects count
- Search and filter
- Actions: Change Role, Reset Password, Suspend, Remove, View Activity
- “Invite Member” button

Navigation From Here:

- Click member → Member Detail Page
 - Click “Invite” → Invite Member Modal
 - Click “Users” tab → Users Management Sub-page
 - Click “Editors” tab → Editors Management Sub-page
-

2.5 Users Management Sub-Page

Route: /dashboard/admin/team/users

Description: Filtered view of team page showing only Users (video creators).

Key Elements: - User-specific metrics: Projects created, videos published, average completion time - Active projects list per user

- User-specific metrics: Projects created, videos published, average completion time
- Active projects list per user
- Performance indicators
- Bulk role changes

Navigation From Here:

- Click user → User Detail Page (admin view)
- Click “Assign Task” → Calendar Scheduling Page with user pre-selected

2.6 Editors Management Sub-Page

Route: /dashboard/admin/team/editors

Description: Filtered view showing only Editors.

Key Elements: - Editor metrics: Tasks completed, average turnaround time, rating - Current workload (active editing tasks)

- Editor metrics: Tasks completed, average turnaround time, rating
- Current workload (active editing tasks)
- Availability status
- Performance history

Navigation From Here:

- Click editor → Editor Detail Page (admin view)
 - Click “View Tasks” → Filtered view of editing tasks for this editor
-

2.7 Member Detail Page (Admin View)

Route: /dashboard/admin/team/[memberId]

Description: Detailed profile of any team member with full activity history.

Key Elements: - Profile card (name, email, role, join date, last active) - Activity timeline

- Profile card (name, email, role, join date, last active)
- Activity timeline
- Projects list (created or assigned)
- Editing tasks (if editor)
- Admin actions: Change Role, Reset Password, Suspend, Remove
- Send direct message/notification

Navigation From Here:

- Click project → Admin Project Detail Page
 - Click “Change Role” → Role Change Modal
 - Back → Team Management Page
-

2.8 Calendar / Scheduling Page

Route: /dashboard/admin/calendar

Description: Full calendar view for scheduling deadlines, meetings, and task assignments.

Key Elements: - Monthly/Weekly/Daily calendar views - Color-coded events by type (deadline, meeting, review, general)

- Monthly/Weekly/Daily calendar views

- Color-coded events by type (deadline, meeting, review, general)
- Drag-and-drop to reschedule
- Click date → Create Task Modal
- Filter by assignee, task type, priority
- List view alternative

Navigation From Here:

- Click event → Task Detail/Edit Modal
- Click “New Task” → Create Scheduled Task Page
- Click assignee name → Member Detail Page

2.9 Create Scheduled Task Page / Modal

Route: /dashboard/admin/calendar/new

Description: Form to create a new scheduled task or deadline for team members.

Key Elements: - Task title, description - Task type: Video Deadline, Meeting, Review, General

- Task title, description
- Task type: Video Deadline, Meeting, Review, General
- Assign to: User dropdown (all workspace members)
- Related project selector (optional)
- Start date/time, End date/time (deadline)
- Priority: Low, Medium, High, Urgent
- Reminder settings (24h before, 1h before)
- Repeat options (daily, weekly, custom)

Navigation From Here:

- Save → Calendar Page (event appears on calendar)
- Cancel → Calendar Page
- On save: Notification auto-sent to assignee

2.10 Admin Workspace Settings

Route: /dashboard/admin/workspace-settings

Description: Workspace configuration from admin perspective (limited compared to owner).

Key Elements: - Workspace info (read-only name/slug) - Default project settings

- Workspace info (read-only name/slug)
- Default project settings
- Member invitation settings

- Notification defaults
- Branding settings (if allowed by owner)
- Export workspace data

Navigation From Here:

- Save → Admin Dashboard
-

2.11 Admin Notifications Page

Route: /dashboard/admin/notifications

Description: All notifications relevant to admin role.

Key Elements: - Filter by type: System, Project Updates, Member Actions, Deadlines - Mark all as read

- Filter by type: System, Project Updates, Member Actions, Deadlines
- Mark all as read
- Notification detail view
- Quick actions from notification (e.g., “View Project”, “Approve Request”)

Navigation From Here:

- Click notification → Relevant detail page
-

2.12 Admin Profile Settings

Route: /dashboard/admin/settings

Description: Admin’s personal account settings.

Key Elements: - Profile info - Change password

- Profile info
 - Change password
 - Notification preferences
 - Calendar integration (Google/Outlook)
-

3. User Portal

Role: User / Video Creator

Purpose: Create and manage video projects, generate content via AI, send for editing, publish to social media.

3.1 User Dashboard / Overview

Route: /dashboard/user

Description: Personal dashboard showing user’s projects, upcoming deadlines, and quick actions.

Key Elements: - Stats: My Projects, In Progress, Completed, Published This Month - Recent projects list with progress bars

- Stats: My Projects, In Progress, Completed, Published This Month
- Recent projects list with progress bars
- Upcoming deadlines (from admin calendar)
- Quick action: “New Project”, “Upload Video”
- Recent notifications

Navigation From Here:

- Click “New Project” → Create New Project Page
 - Click “Upload Video” → Upload Video Page
 - Click “My Projects” → User Projects List Page
 - Click “Notifications” → User Notifications Page
 - Click Project Card → User Project Detail Page
-

3.2 User Projects List Page

Route: /dashboard/user/projects

Description: All projects created by the user with management options.

Key Elements: - Project cards/table: Title, Status, Progress, Deadline, Last Updated - Filters: Status, Date, Priority

- Project cards/table: Title, Status, Progress, Deadline, Last Updated
- Filters: Status, Date, Priority
- Search
- Sort options
- Actions: View, Edit, Duplicate, Delete, Archive
- Status badges with colors

Navigation From Here:

- Click “New Project” → Create New Project Page
 - Click Project Card → User Project Detail Page
 - Click “Edit” → Project Detail Page (edit mode)
-

3.3 Create New Project Page

Route: /dashboard/user/projects/new

Description: Start a new video project.

Key Elements: - Project title (required) - Description (optional)

- Project title (required)
- Description (optional)
- Priority selector (Low, Medium, High, Urgent)
- Deadline (optional, can be set by admin later)
- AI Script Generation toggle:
 - If ON: Topic input, Tone selector, Target duration, Language
 - If OFF: Skip to manual script later
- Create button

Navigation From Here:

- Create → User Project Detail Page (newly created, starts at “Idea” stage)
- Cancel → User Projects List Page

3.4 User Project Detail Page (Timeline View)

Route: /dashboard/user/projects/[projectId]

Description: Central project hub showing the full video generation timeline. This is the heart of the user experience.

Key Elements: - Project header: Title, Status, Progress %, Deadline countdown - **Visual Timeline:**

- Project header: Title, Status, Progress %, Deadline countdown
- **Visual Timeline:**
 - [Idea] → [Script] → [Voice] → [Video] → [Edit] → [Publish]
 - Each stage shows: Status, Timestamp, Assigned To, Action Button
 - Current stage highlighted
 - Completed stages show checkmarks with preview/download
 - Locked stages show “Complete previous stage first”
 - Side panel: Project info, Team members, Activity log

Navigation From Here:

- Click “Generate Script” (Idea stage) → Script Generation Page
- Click “Write Script” (Idea stage) → Script Editor Page
- Click “Generate Voice” (Script complete) → Voice Generation Page
- Click “Generate Video” (Voice complete) → Video Generation Page
- Click “Send for Editing” (Video complete) → Edit Request Page
- Click “Publish” (Edit complete) → Publishing Page
- Click “Back” → User Projects List Page

3.5 Script Generation Page

Route: /dashboard/user/projects/[projectId]/script

Description: AI-powered script generation interface.

Key Elements: - Topic/title input - Tone selector (Professional, Casual, Energetic, Persuasive, etc.)

- Topic/title input
- Tone selector (Professional, Casual, Energetic, Persuasive, etc.)
- Target duration slider (affects word count)
- Language selector
- Additional instructions textarea
- “Generate” button → Loading state → AI output
- Output: Generated script with word count, estimated duration
- Actions: Regenerate, Edit Manually, Approve & Continue
- Side-by-side: Generated script vs. manual editor

Navigation From Here:

- Click “Approve & Continue” → Back to Project Detail (advances to Voice stage)
 - Click “Edit Manually” → Script Editor Page
 - Back → Project Detail Page
-

3.6 Script Editor Page

Route: /dashboard/user/projects/[projectId]/script/edit

Description: Manual script writing/editing interface.

Key Elements: - Rich text editor (headings, bold, lists) - Word count & estimated duration (auto-updating)

- Rich text editor (headings, bold, lists)
- Word count & estimated duration (auto-updating)
- AI assistant sidebar (“Improve this paragraph”, “Make it shorter”)
- Save draft button
- “Mark Complete” button → Advances to Voice stage

Navigation From Here:

- Save → Project Detail Page (script saved as draft)
 - Mark Complete → Project Detail Page (stage advances)
-

3.7 Voice Generation Page

Route: /dashboard/user/projects/[projectId]/voice

Description: Text-to-speech generation with voice selection and preview.

Key Elements: - Script display (read-only from previous stage) - Voice provider selector (from workspace APIs)

- Script display (read-only from previous stage)
- Voice provider selector (from workspace APIs)
- Voice model dropdown (filtered by provider)
- Voice preview player (sample phrases)
- Settings: Speed, Pitch, Emotion, Pauses
- “Generate Voice” button
- Progress indicator during generation
- Output: Audio player with waveform, duration, download
- Actions: Regenerate with different voice, Approve & Continue

Navigation From Here:

- Approve → Project Detail Page (advances to Video stage)
 - Back → Project Detail Page
-

3.8 Video Generation Page

Route: /dashboard/user/projects/[projectId]/video

Description: AI video generation with avatar/scene configuration.

Key Elements: - Voice audio player (from previous stage, confirm it's correct) - Video provider selector (from workspace APIs)

- Voice audio player (from previous stage, confirm it's correct)
- Video provider selector (from workspace APIs)
- Avatar/Character selector
- Background/scene selector
- Resolution settings (720p, 1080p, 4K)
- Additional assets upload (images, logos)
- “Generate Video” button
- Progress bar with ETA
- Output: Video player with preview
- Actions: Regenerate, Download, Approve & Continue

Navigation From Here:

- Approve → Project Detail Page (advances to Edit stage)

- Back → Project Detail Page
-

3.9 Edit Request Page

Route: /dashboard/user/projects/[projectId]/edit

Description: Send video for editing (AI or Human Editor).

Key Elements: - Video preview (from previous stage) - Edit type selector:

- Video preview (from previous stage)
- Edit type selector:
- **AI Edit (Subagic):** Instructions textarea, style presets, auto-enhance toggles
- **Human Editor:** Editor selector dropdown, detailed instructions textarea, priority selector
- Deadline picker (optional, can use admin-set deadline)
- “Send for Editing” button
- Confirmation modal with summary

Navigation From Here:

- Send → Project Detail Page (status: “Editing - Pending”)
 - Back → Project Detail Page
 - On send: Editor receives notification; Admin sees in calendar
-

3.10 Publishing Hub Page

Route: /dashboard/user/publish

Description: Central page for publishing videos to social media platforms.

Key Elements: - Two tabs: “Publish Generated Video” | “Upload & Publish” - Recent publishing history

- Two tabs: “Publish Generated Video” | “Upload & Publish”
- Recent publishing history
- Platform connection status (connected/disconnected)

Navigation From Here:

- Click “Publish Generated Video” → Publish Form (pre-filled from project)
 - Click “Upload & Publish” → Upload Video Page
 - Click history item → Publishing Task Detail
-

3.11 Publish Form Page

Route: /dashboard/user/projects/[projectId]/publish

Description: Configure and publish a completed video to social platforms.

Key Elements: - Video preview - Platform multi-selector (YouTube, TikTok, Instagram, LinkedIn, Facebook, Twitter/X)

- Video preview
- Platform multi-selector (YouTube, TikTok, Instagram, LinkedIn, Facebook, Twitter/X)
- Per-platform configuration:
- Title (auto-suggested from project, editable)
- Description (with hashtag suggestions)
- Tags/Keywords
- Thumbnail (auto-generated frame or custom upload)
- Visibility (Public, Unlisted, Private)
- Category/Topic
- Schedule: Publish Now or Schedule for Later
- “Publish” or “Schedule” button
- Validation checks (video format, duration limits per platform)

Navigation From Here:

- Publish → Project Detail Page (status: Published + platform links)
 - Schedule → Project Detail Page (status: Scheduled)
 - Back → Publishing Hub
-

3.12 Upload Video Page

Route: /dashboard/user/publish/upload

Description: Upload user’s own video and thumbnail for publishing.

Key Elements: - Video uploader (drag & drop, progress bar, format validation) - Thumbnail uploader (or auto-generate from video)

- Video uploader (drag & drop, progress bar, format validation)
- Thumbnail uploader (or auto-generate from video)
- Platform selector (same as publish form)
- Per-platform metadata forms
- Schedule options
- “Publish” button

Navigation From Here:

- Publish → Publishing Hub (with success confirmation)
 - Back → Publishing Hub
-

3.13 User Notifications Page

Route: /dashboard/user/notifications

Description: All notifications for the user.

Key Elements: - Unread count badge - Filter: Deadlines, Edit Updates, Publish Status, System

- Unread count badge
- Filter: Deadlines, Edit Updates, Publish Status, System
- Notification list with timestamps
- Actions: Mark as Read, Archive, Click to navigate
- “Mark All as Read” button

Navigation From Here:

- Click deadline notification → Project Detail Page
 - Click edit complete notification → Project Detail Page (review edit)
 - Click publish complete → External platform link or Project Detail
-

3.14 User Profile & Settings

Route: /dashboard/user/settings

Description: User’s personal settings.

Key Elements: - Profile info (name, email, avatar) - Change password (especially for temp passwords)

- Profile info (name, email, avatar)
 - Change password (especially for temp passwords)
 - Notification preferences (email, in-app, push)
 - Default project settings
 - Connected social accounts (for publishing)
 - API keys view (read-only, workspace-level)
-

4. Editor Portal

Role: Video Editor

Purpose: Receive editing requests, edit videos via AI or manual tools, send back for review.

4.1 Editor Dashboard / Overview

Route: /dashboard/editor

Description: Editor’s central hub showing workload, pending requests, and completed work.

Key Elements: - Stats: Pending Tasks, In Progress, Completed Today, Average Turnaround - Task queue: Incoming edit requests (from users)

- Stats: Pending Tasks, In Progress, Completed Today, Average Turnaround

- Task queue: Incoming edit requests (from users)
- Active tasks currently being worked on
- Overdue tasks highlighted in red
- Quick filters: AI Edit, Manual Edit, Urgent, Overdue
- Performance metrics (optional)

Navigation From Here:

- Click “Pending Task” → Edit Task Detail Page
 - Click “Start AI Edit” → AI Editing Interface
 - Click “Notifications” → Editor Notifications Page
 - Click “Completed” → Completed Tasks History
-

4.2 Editor Tasks List Page

Route: /dashboard/editor/tasks

Description: All editing tasks assigned to or available for this editor.

Key Elements: - Tabs: Pending, In Progress, Under Review, Completed - Task cards: Project name, Requested By, Type (AI/Manual), Deadline, Priority, Status

- Tabs: Pending, In Progress, Under Review, Completed
- Task cards: Project name, Requested By, Type (AI/Manual), Deadline, Priority, Status
- Search and filter
- Sort by: Deadline (urgent first), Request Date, Priority
- Accept/Decline buttons on pending tasks

Navigation From Here:

- Click “Accept” → Task moves to In Progress → Edit Task Detail Page
 - Click “Decline” → Decline reason modal → Task returned to user
 - Click task card → Edit Task Detail Page
-

4.3 Edit Task Detail Page

Route: /dashboard/editor/tasks/[taskId]

Description: Detailed view of a specific editing task with all instructions and assets.

Key Elements: - Task header: Project name, Requested By, Type, Status, Deadline - Original video player

- Task header: Project name, Requested By, Type, Status, Deadline
- Original video player
- Instructions from user (prominent display)

- Admin deadline badge (if set by admin)
- Action buttons based on status:
- **Pending:** Accept Task, Decline Task
- **In Progress:** Open AI Editor / Download for Manual Edit, Mark Complete
- **Review:** View user feedback, Submit Revision
- Communication thread (comments between editor and user)
- Activity log

Navigation From Here:

- Click “Accept” → Status changes to In Progress
- Click “AI Edit” → AI Editing Interface (Subagic)
- Click “Manual Edit” → Download assets + upload edited version
- Click “Mark Complete” → Send to User for Review → User gets notification
- Back → Editor Tasks List

4.4 AI Editing Interface (Subagic Integration)

Route: /dashboard/editor/tasks/[taskId]/edit

Description: Built-in or embedded interface for AI-powered video editing via Subagic API.

Key Elements: - Original video player (left) - AI editing controls (right):

- Original video player (left)
- AI editing controls (right):
- Enhancement presets (Auto-color, Noise reduction, Stabilize)
- Style options (Cinematic, Vlog, Corporate, etc.)
- Text overlay editor
- Transition selector
- Music/Audio overlay
- Trim/cut timeline
- “Preview” button → Generates preview
- AI processing progress bar
- Output preview player
- Compare: Before / After split screen
- “Approve & Send” button → Sends to user for review
- “Save Draft” button

Navigation From Here:

- Approve & Send → Edit Task Detail Page (status: Under Review)

- User receives notification with preview link
 - Back → Edit Task Detail Page
-

4.5 Manual Edit Upload Page

Route: /dashboard/editor/tasks/[taskId]/upload

Description: Upload manually edited video file to return to user.

Key Elements: - Video uploader (drag & drop) - Upload progress

- Video uploader (drag & drop)
- Upload progress
- Preview player (verify upload)
- Change notes textarea (what was edited)
- “Send for Review” button

Navigation From Here:

- Send → Edit Task Detail Page (status: Under Review)
 - User receives notification
-

4.6 Editor Notifications Page

Route: /dashboard/editor/notifications

Description: All notifications for the editor.

Key Elements: - Filter: New Edit Requests, Deadline Reminders, User Feedback, System - Unread count

- Filter: New Edit Requests, Deadline Reminders, User Feedback, System
- Unread count
- Quick actions: Accept Task, View Task, Mark as Read
- Deadline reminders with countdown

Navigation From Here:

- Click “New Request” → Edit Task Detail Page
 - Click “Deadline Reminder” → Relevant Task Detail Page
 - Click “User Feedback” → Task Detail with feedback thread
-

4.7 Completed Tasks History

Route: /dashboard/editor/completed

Description: Archive of all completed editing tasks for reference.

Key Elements: - Completed task list with completion date, project name, user - Download original + edited video

- Completed task list with completion date, project name, user
- Download original + edited video
- View feedback/rating from user (if implemented)
- Reopen task button (if user requests revision)

Navigation From Here:

- Click task → Edit Task Detail Page (read-only mode)
- Click “Reopen” → Task returns to In Progress

4.8 Editor Profile & Settings

Route: /dashboard/editor/settings
Description: Editor’s personal settings.
Key Elements: - Profile info - Change password

- Profile info
- Change password
- Notification preferences
- Availability status (Available, Busy, Away)
- Default editing tools/settings

5. Cross-Portal Connectivity Map

This section defines how pages across different portals connect to each other through actions, notifications, and shared views.

5.1 Owner Admin Connectivity

Owner Page	Action	Connects To Admin Page	Trigger
Workspace Detail	Click “Act As Admin”	Admin Dashboard	Owner enters workspace as Admin
Workspace Detail	Click “Members” tab	Team Management	Owner inspects admin’ s team
Workspace Projects	Click “View” on project	Admin Project Detail	Owner inspects a user’ s project
Invite Member	Send invite	Team Management	New member appears in admin’ s team list
Workspace Settings	Suspend workspace	Admin Dashboard (locked)	Admin sees workspace suspended notice

Reverse (Admin → Owner):

Admin Page	Action	Connects To Owner Page	Trigger
Admin Workspace Settings	Request API key	Owner API Config	Admin requests new API integration
Team Management	Remove member	Owner Member Management	Synced in real-time

5.2 Admin User Connectivity

Admin Page	Action	Connects To User Page	Trigger
Calendar	Create deadline task	User Notifications + Project Detail	User sees deadline in notifications and project
Calendar	Assign task to user	User Notifications	User receives task assignment notification
Admin Projects	Edit user' s project	User Project Detail (if user viewing)	Real-time update or notification
Admin Projects	Reassign project	User Projects List	Project moves to new user' s list
Team Management	Reset user password	User Settings (force logout)	User must log in with temp password
Member Detail	Send notification	User Notifications	Direct message/alert to user

Reverse (User → Admin):

User Page	Action	Connects To Admin Page	Trigger
Create New Project	Create project	Admin Projects Page	New project appears in admin' s list
Project Detail (any stage)	Complete stage	Admin Projects (status update)	Admin sees progress update
Edit Request	Send to editor	Admin Calendar (if deadline set)	Admin sees editing task in workflow
Publish Form	Publish video	Admin Projects (status: Published)	Admin sees final status
User Settings	Change profile	Team Management (avatar update)	Admin sees updated info

5.3 User Editor Connectivity

User Page	Action	Connects To Editor Page	Trigger
Edit Request	Send to AI Editor	Editor Tasks List (new task)	Editor sees new AI edit request
Edit Request	Send to Human Editor	Editor Tasks List (new task)	Editor sees new manual edit request
Edit Request	Add instructions	Edit Task Detail	Instructions appear in editor's view
Project Detail	Cancel edit request	Editor Tasks List (task removed)	Editor sees task cancelled

Reverse (Editor → User):

Editor Page	Action	Connects To User Page	Trigger
Edit Task Detail	Accept task	User Project Detail (status: Editing)	User sees editor accepted
AI Editing Interface	Send for review	User Notifications + Project Detail	User gets “Edit Complete” notification
Manual Edit Upload	Send for review	User Notifications + Project Detail	User gets preview link
Edit Task Detail	Decline task	User Notifications	User gets decline reason, can resend
Edit Task Detail	Request clarification	User Notifications	User gets message from editor

5.4 Owner User/Editor Direct Connectivity

Owner Page	Action	Connects To User/Editor Page	Trigger
Workspace Detail	Click “Act As User”	User Dashboard	Owner sees exactly what user sees
Workspace Detail	Click “Act As Editor”	Editor Dashboard	Owner sees exactly what editor sees
Project Inspection	Click “Enter as Admin”	Admin Project Detail	Owner can then edit as admin
Member Management	Reset password	User/Editor Settings (force logout)	Member must re-login

Table 7 – continued

Owner Page	Action	Connects To User/Editor Page	Trigger
Invite Member	Send invite	Login Page (for new user)	New user receives email with temp password

5.5 Publishing Flow Connectivity (User → External → Admin/Owner)

User Page	Action	Connects To	Trigger
Publish Form	Click “Publish”	External Platform (Zernio API)	Video uploaded to social media
Publish Form	Schedule post	Publishing Tasks (DB)	Scheduled task created
Upload Video	Publish	External Platform + Admin Projects	Admin sees published status
Publishing Hub	View published video	External Platform URL	Opens YouTube/TikTok in new tab

6. Notification & Action Triggers

This matrix shows which actions trigger notifications and where they route.

6.1 Notification Routing Matrix

Trigger Action	Sender	Recipient	Notification Type	Recipient Page Link
Owner creates workspace	Owner	Invited Admin	invite	Admin Dashboard
Admin invites user/editor	Admin	Invited Member	invite	Login/Set Password
Admin creates deadline	Admin	Assigned User/Editor	deadline	Project Detail / Calendar
User creates project	User	Admin	project_created	Admin Project Detail
User sends edit request	User	Editor	edit_request	Editor Task Detail
Editor accepts task	Editor	User	system	Project Detail
Editor completes edit	Editor	User	edit_complete	Project Detail (review mode)
Editor declines task	Editor	User	edit_rejected	Edit Request Page
User publishes video	User	Admin	publish_complete	Admin Project Detail
Publishing fails	System	User + Admin	publish_failed	Publish Form / Admin Projects

Table 9 – continued

Trigger Action	Sender	Recipient	Notification Type	Recipient Page Link
Deadline approaching (24h)	System	Assigned User	deadline_reminder	Project Detail
Owner suspends workspace	Owner	All Members	system	Login Page (blocked)
User mentions in comment	User	Mentioned User	mention	Project Detail

7. Complete Navigation Flow Diagrams

7.1 Owner Portal Internal Flow

```

Owner Dashboard
|
├── Workspaces List
|   ├── Create New Workspace
|   |   └── → Workspaces List (new workspace added)
|   └── Workspace Detail
|       ├── Act As Admin → Admin Dashboard (same workspace)
|       ├── Act As User → User Dashboard (same workspace)
|       ├── Settings → Workspace Settings
|       ├── APIs → API Config → New API Config
|       ├── Members → Member Management → Invite Member
|       └── Projects → Projects Inspection → Project Detail (read-only)
|
├── Cross-Workspace Projects → Project Detail (read-only)
├── Global API Management → Edit API Config
└── Settings → Profile Settings
  
```

7.2 Admin Portal Internal Flow

```

Admin Dashboard
|
├── Projects
|   ├── Project List
|   |   ├── View → Project Detail (editable)
|   |   └── Edit → Project Edit
|   └── New Project (optional)
|
├── Team Management
|   ├── All Members → Member Detail
|   ├── Users → User Detail → Assign Task → Calendar
|   ├── Editors → Editor Detail → View Tasks
|   └── Invite Member
|
├── Calendar
|   └── View Events
  
```

```
| | Click Date → Create Task
| | Click Event → Edit Task
|
| Workspace Settings
| Notifications
```

7.3 User Portal Internal Flow

User Dashboard

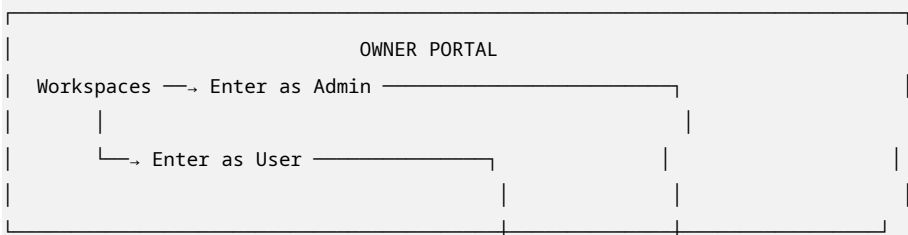

```
|
| Projects List
| | New Project → Project Detail (Idea stage)
|
| Project Detail (Timeline Hub)
| | Idea Stage
| | | Generate Script → Script Generation → Approve → Voice Stage
| | | Write Script → Script Editor → Complete → Voice Stage
| | Voice Stage → Voice Generation → Approve → Video Stage
| | Video Stage → Video Generation → Approve → Edit Stage
| | Edit Stage → Edit Request → Send to Editor → Waiting
| | Publish Stage → Publish Form → Published/Scheduled
|
| Publishing Hub
| | Publish Generated Video → Publish Form
| | Upload & Publish → Upload Video → Publish Form
|
| Notifications
```

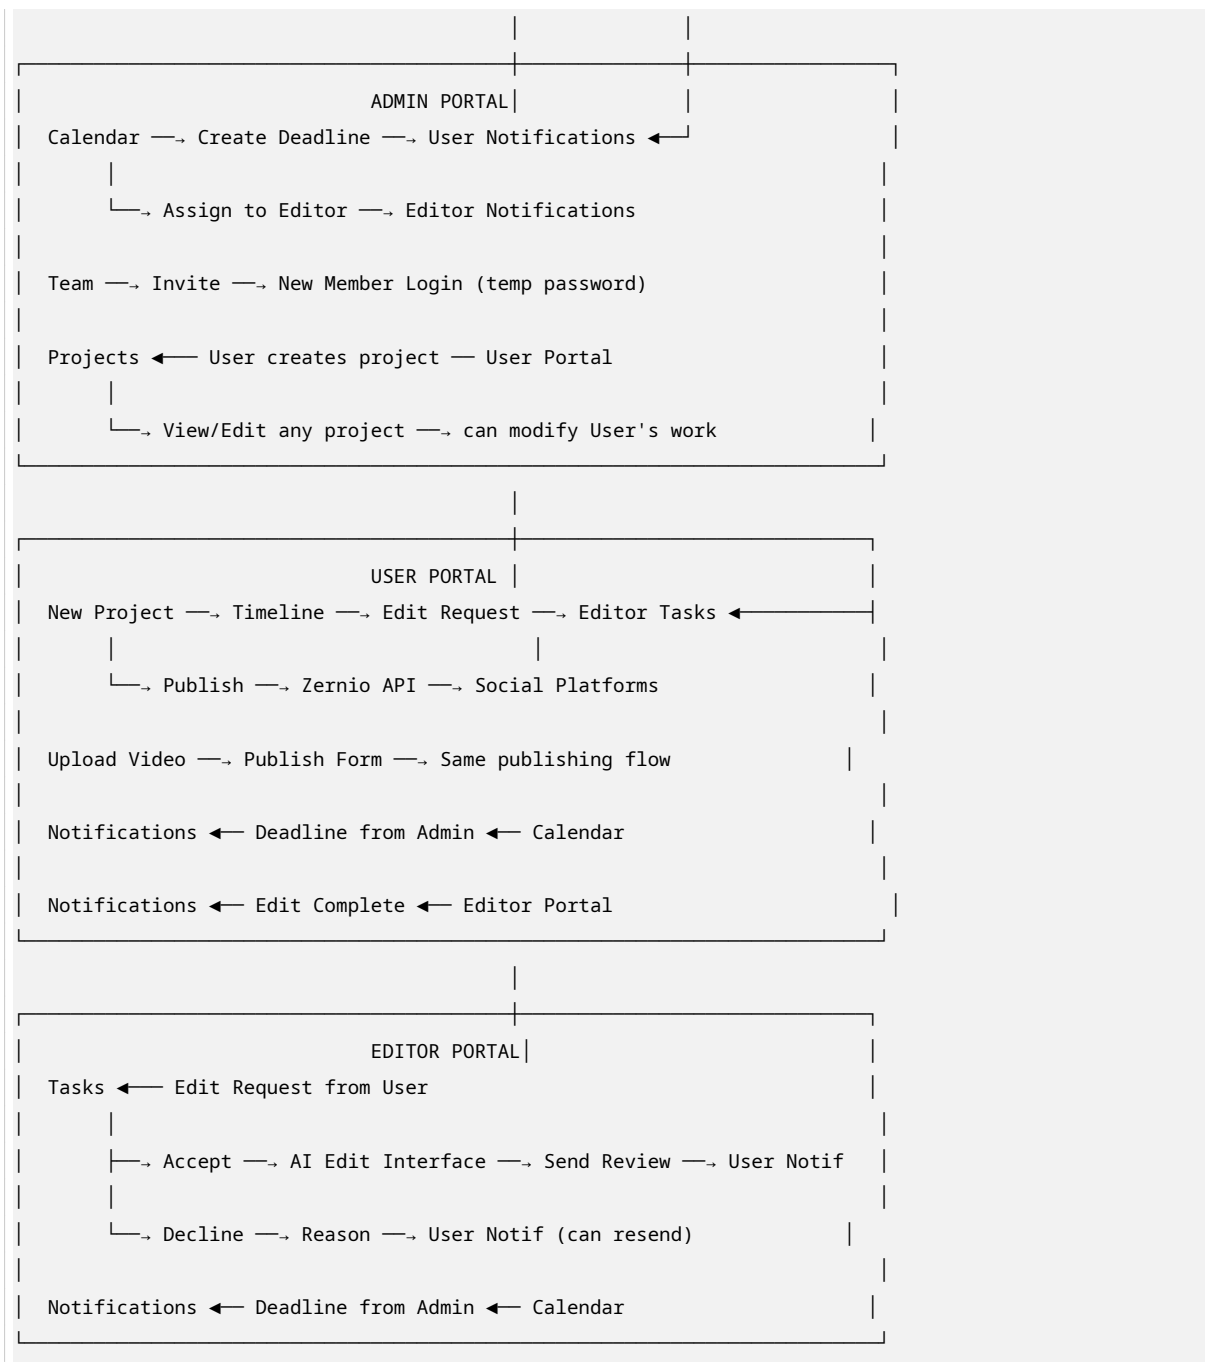

7.4 Editor Portal Internal Flow

Editor Dashboard

```
|
| Tasks List
| | Pending Task → Task Detail → Accept/Decline
| | | Accept → AI Edit Interface → Send for Review → User notified
| | | Decline → Reason → User notified
| | In Progress → Task Detail → AI Edit / Manual Upload → Send for Review
| | Completed → Task History
|
| Notifications
| Settings
```

7.5 Cross-Portal Master Flow

8. Page Access Matrix by Role

Page	Owner	Admin	User	Editor	Notes
Owner	✓	✗	✗	✗	Owner only
Dashboard					
Workspaces	✓	✗	✗	✗	Owner only
List					
Create	✓	✗	✗	✗	Owner only
Workspace					

Table 10 – continued

Page	Owner	Admin	User	Editor	Notes
Workspace Detail (Owner)	✓	✗	✗	✗	Owner only
Workspace API Config	✓	✗	✗	✗	Owner only
Cross-Workspace Projects	✓	✗	✗	✗	Owner only
Admin Dashboard	✓ (as admin)	✓	✗	✗	Admin + Owner-as-admin
Admin Projects	✓ (as admin)	✓	✗	✗	Admin + Owner-as-admin
Team Management	✓ (as admin)	✓	✗	✗	Admin + Owner-as-admin
Calendar	✓ (as admin)	✓	✗	✗	Admin + Owner-as-admin
User Dashboard	✓ (as user)	✗	✓	✗	User + Owner-as-user
My Projects	✓ (as user)	✗	✓	✗	User + Owner-as-user
Project Detail	✓ (as user)	✓ (admin view)	✓	✗	All except Editor
Script/Voice/Video Gen	✓ (as user)	✗	✓	✗	User only
Edit Request	✓ (as user)	✗	✓	✗	User only
Publishing Hub	✓ (as user)	✗	✓	✗	User only
Editor Dashboard	✓ (as editor)	✗	✗	✓	Editor + Owner-as-editor
Editor Tasks	✓ (as editor)	✗	✗	✓	Editor + Owner-as-editor
AI Edit Interface	✓ (as editor)	✗	✗	✓	Editor + Owner-as-editor
Notifications	✓	✓	✓	✓	All roles
Settings	✓	✓	✓	✓	All roles (scoped)

9. URL Structure Summary

```
# Public
/           → Landing Page
/features   → Features Page
/login      → Login
```

```

/register          → Register
/forgot-password   → Forgot Password

# Owner Portal
/dashboard/owner          → Owner Dashboard
/dashboard/owner/workspaces → Workspaces List
/dashboard/owner/workspaces/new → Create Workspace
/dashboard/owner/workspaces/[id] → Workspace Detail
